# SURAJ SAKPAL

MERN Stack Developer | React.js | Node.js | TypeScript | Express.js | MongoDB

+91 9271591820 | surajsakpal2004@gmail.com | Mumbai, Maharashtra, India | linkedin.com/in/suraj-sakpal | github.com/surajsakpal7061

## TECHNICAL COMPETENCIES

**HTML** | **CSS** | **React.js**

**Node.js** | **JavaScript (ES6+)** | **TypeScript**

**Express.js** | **Next.js** | **Python**

**Also working with:** Tailwind CSS, Bootstrap, MongoDB, MySQL, Express.js, REST APIs, JWT,

**Deployment & DevOps:** VPS Deployment, Linux Server, Nginx Config, Domain & DNS, SSL Setup

**Monitoring & Analytics:** Google Analytics

**Other:** SEO, Responsive UI/UX,

**Tools:** Git, GitHub, Postman

## WORK HISTORY

### Full Stack Developer — LocalVocalize Startup, Maharashtra Sep 2024 – Current

- Developed and maintained production web applications using React.js, Node.js, Express.js, MongoDB and TypeScript, working across frontend and backend modules.
- Built secure REST APIs with JWT-based authentication and role-based access control (RBAC) to manage user permissions and platform activity.
- Developed a matrimonial platform (vvkunbiasmita.org) with profile management, filtering, aggregation and RBAC-based administration.
- Designed a config-driven architecture for an investment platform (investmentbook.in), enabling a single reusable form engine to manage multiple data models.
- Built a reusable dynamic form engine to handle create and update workflows across modules, reducing duplicate code.
- Implemented reusable state-managed modules using React Query to streamline CRUD operations across applications.
- Styled responsive, cross-browser-compatible UIs using Tailwind CSS and Bootstrap, ensuring a consistent experience across devices.
- Deployed and managed production applications on VPS with Nginx configuration, Linux server administration (Ubuntu), domain/DNS management, and SSL setup.
- Implemented SEO best practices and integrated Google Analytics for traffic monitoring and performance insights.
- Used Git, GitHub, and Postman for version control and API testing/documentation throughout the development lifecycle.

## PROJECTS

**CareerMatch AI** — Generative AI / Full-Stack Web Application

CareerMatch AI helps candidates improve their chances of getting hired by analyzing job requirements, identifying skill gaps, and preparing personalized technical and behavioral interview questions with suggested answers.

It also generates a tailored, ATS-friendly resume to highlight relevant skills and experience, helping candidates make a stronger impression on recruiters and interviewers.

**InvestmentBook** — React.js | Node.js | Express.js | MongoDB | Config-Driven Architecture • Designed a config-driven architecture with a single reusable dynamic form engine to manage multiple data models across modules.

## EDUCATION

**MSc Computer Science** — Vartak College Vasai 2024 – 2026
**BSc Computer Science** — G M Vedak College

## CERTIFICATION

Master React.js — Code Compile
